

## SUSTAINABLE PURCHASE POLICY

In line with the understanding of sustainable supply, our suppliers/solution partners;

- To have Quality Assurance Management Systems, Environmental and Occupational Health and Safety Management Systems, and internationally accepted environmental and sustainability labels/certificates,
- To have no harmful effects on the environment in production and supply, to comply with environmental legislation,
- Resources; using/consuming appropriately without harming natural life and ecosystem, complying with hunting bans,
- It works to minimize its waste and manage it correctly, it offers less packaging in product packaging or offers bulk packaging alternatives,
- Environmentally friendly, economical, local, ethical values, using recyclable or recycled materials, organic, bio, vegan, not tested on animals, free of harmful chemical components, etc. to offer alternatives,
- Being a domestic and local production/service provider,
- To be a product/service that reflects/promotes the cuisine, traditions and culture of our country/region,

It gives importance and conveys this point of view to our stakeholder suppliers. We try to create efficient purchasing opportunities together with our suppliers, and we continue our work by adopting the principle of minimizing the environmental impacts arising from the procurement processes.
